Our Plan!

We decided to plan an adventure at Fire Island! This is an island just off the south shore of Long Island. It's known for having deep forests and high dunes, which we think is perfect for an adventure to connect to nature!

OUR PLAN

Continued...

Of course, when going on our adventure to explore and get lost in our surroundings, we have to plan ahead!

For snacks we decided to carry organic gala apples (which happens to be in season in NY!), homemade trail mix, and water that we keep in a Klean Kanteen Water bottle. Klean Kanteen is an amazing company because they are BPA-free, reusable, and take the place of single-use plastic water bottles. Additionally, we wanted to make sure to not to overpack that way we could travel light on our adventure! This way, nothing can weigh us down! In order to carry this, we can use an Numi Organic Tea Hand Bag! This tote bag is made from 100% recyclable and biodegradable material!

OUR PLAN

Continued...

Transportation: In order to arrive at Fire Island to begin our adventure, we first have to get there! In order to decrease carbon emissions, we can take public transportation, such as a bus! This is far better than driving ourselves there. Additionally, in order to get from the mainland to Fire Island itself, we have to take a boat.

Finally, in order to insure that we are having a sustainable adventure, we can do activities that have a low carbon impact on the environment! For example, we can go rafting or hiking!

*We can't wait to go on this
adventure!*
