PGC Greenest Day 14 Scavenger Hunt

Where were we?

- We went to the Mall of **Washington D.C.**
- On the mall there were large trees with healthy foliage.
- There was minimal pollinator activity
- Also, there were many gardens.

Plants?

This purple flower is most likely a **Wild Hyacinth**.

Plants?

This purple flower is probably a

Perennial Geranium.

Pollinator?

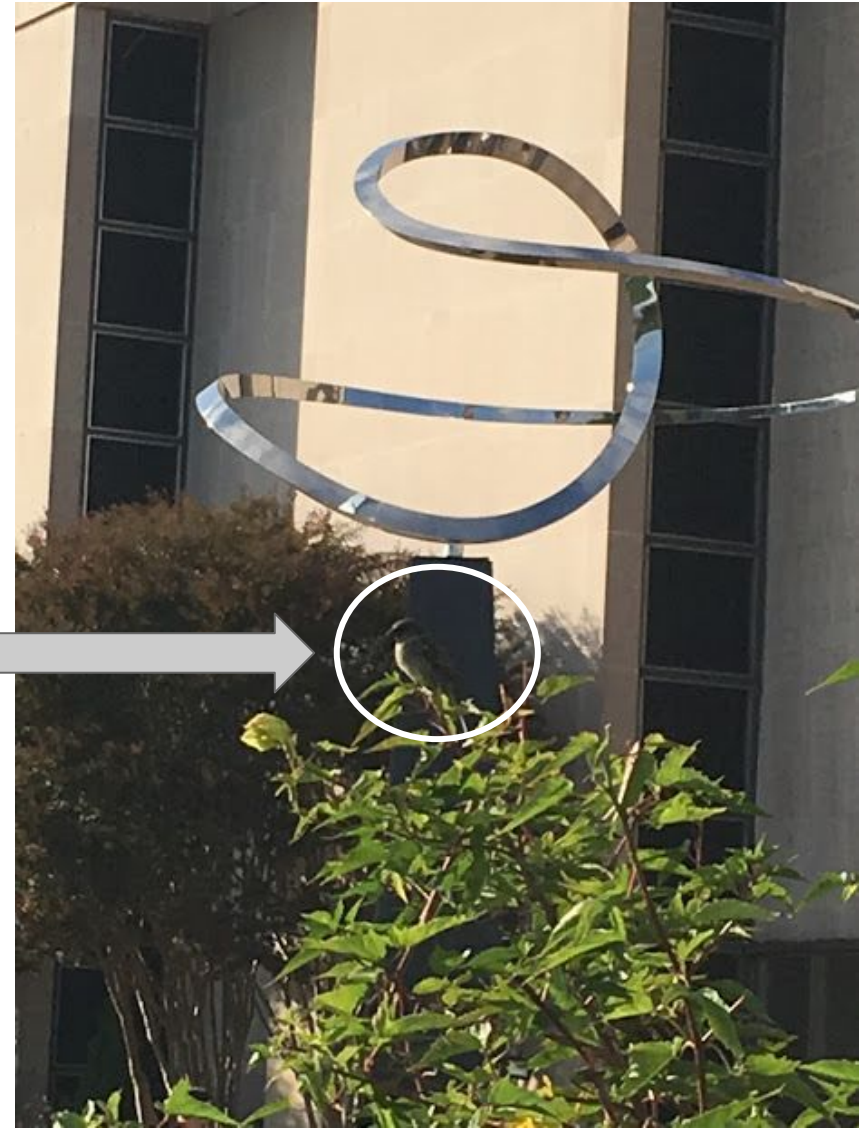

In this picture a bee is pollinating a **Wild Hyacinth**.

Birds?

The bird of this photo is a
Sparrow.

Terrain? Sky?

In Washington D.C., there was well manicured grass with fresh dew on it.

The sky was clear. The sun was shining bright.

How has the challenge impacted you?

- After taking an adventure into Washington D.C. to see the gardens and ecosystem I found the diversity of flowers to be breathtaking. There was such a vast variety of color that made the garden feel like an art museum.
- Something that was surprising about the adventure into D.C. was the amount of green space. Unexpectedly, there were many trees and gardens. Previously, we thought that D.C. was mainly walkways, buildings, and streets.

Sharing Our Adventure

- We asked our friend Ailysh to join us on a nature tour of D.C. next weekend.
