

# **Let's get high...**

**Let's get high carbon deposits into the soil  
Through the stems of fibrous hemp.  
Let's get High environmental recovery,  
With toxins free, degradable plastics,  
Sustainable foods, and good-looking fabrics  
By seeding the land with this miraculous plant.  
Let's get high support to the local farmers  
Who are competing against foreign others  
And ridiculous laws that keep them in corners.  
Let's unban the green fields of hemp!  
And put a ban on corporate unmanaged pollution.  
Request governments for better waste regulations,  
Ban the styrene plastics and non-reusable products consumption.  
Empower environment-friendly production.  
That is your job to do for me,  
Yes, you my government, can you?  
I bet you're thinking "Are you high? Who has time? No, cannot do."  
But hemp can do all these and more,  
It's up to you to let hemp grow, and only you.**

Did you know that 1 acre of industrial HEMP produces as much as 2-3 acres of cotton? Industrial hemp has over 50, 000 different uses that benefit the people and the well-being of our planet! Did you know industrial hemp was banned in the U.S. in 1937 solely because of its family name, Cannabis Sativa, which is similar to marijuana...But unlike marijuana, HEMP is the most miraculous and nature friendly plant there is on this planet!!!

Let's get high...

Let's get high carbon deposits into the soil  
Through the stems of fibrous hemp.

Let's get High environmental recovery,  
With toxins free, degradable plastics,  
Sustainable foods, and good-looking fabrics  
By seeding the land with this miraculous plant.

Let's get high support to the local farmers  
Who are competing against foreign others  
And ridiculous laws that keep them in corners.

Let's unban the green fields of hemp!  
And put a ban on corporate unmanaged pollution.  
Request governments for better waste regulations,  
Ban the styrene plastics and non-reusable products consumption.  
Empower environment-friendly production.

That is your job to do for me,  
Yes, you my government, can you?  
I bet you're thinking "Are you high? Who has time? No, cannot do."  
But hemp can do all these and more,  
It's up to you to let hemp grow, and only you.
