

Project Green Challenge

Day 21

Clean: Greenest

Escondido Adventist Academy

A basket filled with cleaning supplies. In the foreground, there is a green and purple microfiber cloth. Behind it, a blue spray bottle, a green bottle, and a green tool are visible. The background is a plain, light-colored wall.

**I MADE AN ALL
PURPOSE CLEANER!**

isaacgoesgreen

I posted a video of the process of making the natural all purpose cleaner with Women's Voices for the Earth's recipe. Once played, viewers can easily see how much water, vinegar, and essential oil is put in the mixture. This video allows viewers to easily follow along to make their own natural all purpose cleaners. The process was very simple (even though I spilled some water, oops) and fun to make in a reusable spray bottle.

HOW TO MAKE ALL PURPOSE CLEANER

isaacgoesgreen

I also included a photo of one of the toilets at my house before it was cleaned. The yellow stain around the drain has always been there because it is very difficult to remove with conventional cleaning products. The stain was easily removed with my cleaner, as viewers can see in the next photo. I included this photo to show that the all purpose cleaner works effectively.

----- HOW TO REMOVE STAIN

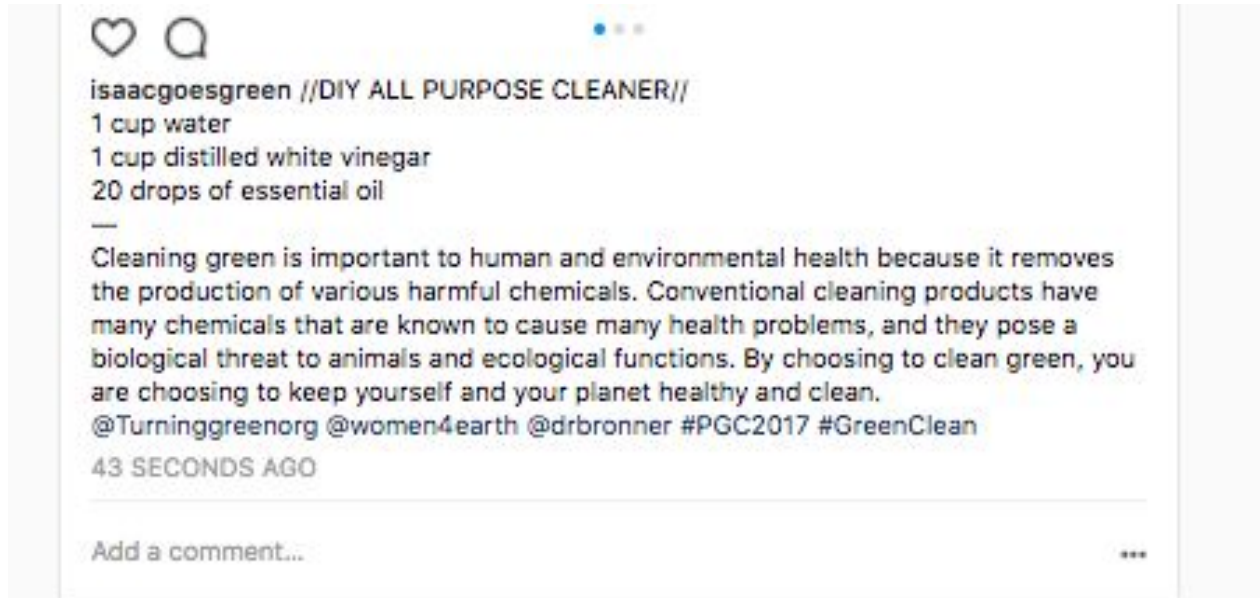

isaacgoesgreen

This is a photo of the same toilet bowl after my new natural all purpose cleaner was applied to it. All stains were easily removed and left a clean, fresh smell of the essential oil I used. Products in the past normally leave a chemically smell that really hurt my sinuses. But this new smell was much more pleasant and left the bowl much cleaner. I included this photo to show viewers how easy it is to remove stains with the natural all purpose cleaner.

Post Caption

In the caption for the video and two photos, I listed the ingredients needed for the recipe. I also explained why cleaning green is important to human and environmental health because it restricts the production of harmful chemicals that pose as hazards.
