**yohie\_the\_gamer** To do something about non-use of styrofoam, I sent messages to a few politicians in our area. So far I got a couple of replies. I hope I get to start something to push for #zerowaste or at least #nostyrofoam . @5Gyres @turninggreenorg #foamfree #PGC2017 #day3 #day4 #greener

I hope legislators in our area do respond to this positively. I got two replies so far.

Instagram

yohie\_the\_gamer #saynotostyrofoam poster. Did you know styrofoam comprises majority of marine debris? Manufacturing it causes air pollution and hastens climate change. Its main ingredient, styrene, causes health problems. It is non-biodegradable. AND there are alternatives. Let us choose not to use styrofoam products.

Posted my "No to Styro" poster, too.
