# Day 1, Greener Task, “Why?”

The Green Giants:

Three of us, all from different lands,

Two from India and one from Poland.

And yet, our love for nature brings us together,

Like the ingredients in a soup full of flavour.

Keerthana’s the veggies, a colourful congregation.

The practised brains behind the operation.

An unusual chief, the one in the lead,

Searching for a truth, an answer, a meaning.

Izabella’s the spice that will be the solution,

With passionate words, ready to ignite a revolution.

The one whose confidence knows no bounds,

Whose sizzling words hide the profound.

And Tisya's the broth, ever flowing and versatile,  
Who can only be happy when doing something tactile.  
Filled with energy, flowing past the brim,  
Ever full of action and ever full of grins.

The thinker, the talker, the do-er, a fearsome trio,  
All come together to become environmental heroes.  
As we look on to our bleak future in defiance,  
We make a team worthy of giants.
