TC Williams High School

Presidential plan

12am:

- Create the federal holiday of Sustainability Day and encourage people to pick up trash around their neighborhood to inspire people to reduce waste

1am:

- Create more tolls and increase the prices to discourage driving cars

2am:

- Make buses, trains, and other public transportation cheaper as an incentive to ride it

3am:

- Lower taxes on cars that are energy efficient or electric to encourage the use of cleaner vehicles

4am:

- Pass a law that only 2 bags of trash will be picked up weekly and the rest will have to be handled by the homeowner to raise awareness for waste

5am:

- Increase water prices in order to prevent using a lot of water

6am:

- Fund water treatment facilities to increase the cleanliness of water

7am:

- Re-enter the Paris Climate Agreement

8am:

- Make plans to build more wind turbines in less inhabited lands to generate electricity without disturbing people or natural life.

9am:

- Decrease imports of coal and other fossil fuels to reduce greenhouse gas emissions

10am:

- Set up a hydroponic garden at the white house that will be used to give food to homeless shelters in Washington DC to demonstrate sustainable agriculture and provide food to the less fortunate

11am:

- Fund environmentally friendly classroom lessons/activities, such as growing a school garden and teaching students about renewable resources to educate rising generations

12pm:

- To lean people towards renewable energy sources, require that private houses and buildings must have some form of a renewable energy source that accounts for at least 20% of their energy use

1pm:

- Institute a 1% tax break for every tree planted by a household to boost environmentally friendly practices

2pm:

- Create sanctuaries for endangered species and fund research to aid in their growth and development

3pm:

- Require all feminine hygiene product companies to make organic, biodegradable products because it is better for the environment

4pm:

- Increase the federal budget for green energy sources by taking away money from fossil fuel budgets to sustain a clean environment for the future

5pm:

- Put money into the refurbishment of water wheels and dams to expand the countries reliance on renewable resources

6pm:

- Protect parks and beaches from waste and littering by putting more trash and recycling cans along with signs to encourage people to dispose of their waste

7pm:

- Institute tax breaks for large corporations that use green energy sources and have little pollution

8pm:

- Create a policy in grocery stores to prevent over packaging of items that don't need it to reduce the amount of plastic used

9pm:

- Hold a nationally televised event to educate the general public on problems affecting our planet, using strongly researched evidence to back up the claims

10pm:

- Increase gas prices for cars to promote cleaner transportation methods

11pm:

- Increase regulation for hunting laws to prevent the overkill of animals for sport/personal use

Throughout this 24 hours, we took on the main issue of pollution. We took on this issue because it is one of the most important issues affecting the well being of the earth.
