

SO FOR TODAY'S TASK I DECIDED TO MAKE TROUSER

From the very beginning when I got into the clothing brand industry. I told myself I won't put on any other branded dresses and I went by that for as long as possible till 2022 and that was because I decided to put my career on hold in order to learn and gain full control of the entire process. Reason being that you can't be in competition with people and purchase their products.

So it got really challenging from 2022 when I stopped and started buying branded dresses but with their brands not visible to the eye. So right now my closet is filled with somewhat boring outfits or hand made (sewed) dresses which I just managed to style them in different ways .

So right in 2024 I started practicing tailoring because I depended mostly on visuals that is creating a visual and printing on the already made dresses which is good but not good enough.

I believe as a brand owner you must be able to create your own designs and with some extra materials gotten from clients whose dresses have been completed by my tutor who then lets me practice my skills with them.

Today I was tasked to doing my passion

Am I not lucky 😊.

Lol the good part is you don't get to buy materials for there is usually excess of it after every finished work .

VIDEO OF THE PROCESS WAS POSTED ON SOCIAL MEDIA HERE IS JUST THE FINAL RESULTS.
