School: Jericho High School

# FURNITURE & DECOR

## 1. Origami Decor

With lots of empty space on the walls, some nice décor is in order! One easy and quick piece of art to DIY was this origami art! We used paper to make this, and there's no glue used to hold it together! This decoration is more sustainable than conventional store bought art, as paper can be easily compostable

## 2. Wood Painting

Scrap wood from an old project and some nice paints make for a great DIY décor project! This fun little pineapple is a great addition to the house, and is super easy, cheap and sustainable.

# FURNITURE & DECOR

## 3. Chicken Roost

One of our members raises chicken in her small backyard farm! Over quarantine, she got some more baby chicks and raised them, but they're now running out of space in their coop. To help give some more space to the growing chickens, she made a new roost with scrap wood and an old branch. The chickens really enjoy it! This project utilizes scrap wood and branches, and screws and you need some power tools, so it's reasonably sustainable and for a great use!

Left to Right: Cham Cham, Avocado, Ginger, Gub Gub, Attila, Nugget, and Yolki!

We made our own chicken feeders! We built our own chicken coop! These are from a while back when we first got out chicken Nug Nug!

# FURNITURE & DECOR

## 4. Shelves

With a growing collection of knick-knacks and some empty space, we're planning to build these shelves! They can be made from spare wood and glue, which is a great use of our resources.

Something similar is on craigslist if we can't find the time to do it as well!

## 5. Shelf For plants

Our succulent collection is rapidly expanding, and as our house plants accumulate, the table they're currently living on is overflowing! This shelf would be an easy DIY to organize our plants, as well as give them all easy access to sunlight! Again, can be made with extra wood, screws/nails and the proper tools, all of which we already own! Also, an alternative is Craigslist, as there are many nice listings nearby us!

## 6. Bonus: Ski Chair

Last winter, we made this ski chair out of old skis and wood! After going to our local ski shop, we noticed there were often very beat up unusable skis about to be thrown out or sold for very little. We had seen this super cool chair design at ski resorts, so we decided to make it ourselves! This design recycled the old skis, and look awesome too!
