

Create a list of all of the things water brings you. From your favorite pair of jeans to happy plants in your home, water impacts your life in ways you may not have thought about before.

- My plants
- Clothing
- The pear in my backpack right now
- Almost everything I own and use

Read [this article](#) describing some of the valuable roles water plays in our lives. Reflect and briefly answer the following:

Reflection: This article was really interesting, but I wished they put more sources. I wanted to look more into some of the ideas they presented, but they didn't show where they got them from.

- What surprised you about your relationship with water?
 - That only $\frac{1}{5}$ of the economy would completely stop without reliable and clean water. It seems like everything is intertwined with water, how is there so many products that wouldn't be stopped? Like just thinking about fishing, aquariums, zoos, etc would seem like a whole lot of the economy. Not to mention production of material, farming, and other big parts of it.
- How can you be more mindful and appreciative of water going forward?
 - Paying attention to how much water it takes to make everything I use, and being conscious about how it affects our world. I can make small decisions to use things that use less water.

Now ask 2-3 family members or friends to think about these questions as well.

They said about the same thing, and mentioned buying things used more often as a solution they wanted to take to help reduce water use while shopping.

Next, make a list of all of your interactions with water. Create a graphic of your choice (art piece, drawing, photo collage, infographic or otherwise) to depict your relationship with water. Be creative! Upload on Instagram with an informative caption, and invite others around you to do the same! Tag [@TurningGreenOrg](#) in both the image and caption, and include [#PGC2021](#).

- Faucet use
- Staying clean and showering
- Food
- Hydration
- Clothing

- Fabrics and furniture
