MESSAGE ABOUT CLIMATE CHANGE- GREENEST

Message:

Climate change is happening, and we have been trying to reduce the emissions of greenhouse gasses by applying different methods and doing actions to contribute to the solution, however we won't have enough time to continue working like this, that's the reason why all of us must put our effort in order for changing the way we have been working.

First of all, I would like to thank all the environmental leaders that have been helping us in the construction for a better world, through their messages and actions that apply everyday. Believe us, the results of your efforts are seen in all the people who are interested in contributing to change their own lifestyles, in order to make them greener.

Through this media, I would like to request all the leaders to talk about the significant participation of a common person in the solution of environmental issues. Since, through my years of life, I have noticed that the main topic when we talk about the solution of environmental problems, is the important participation of the richest countries in developing new ways to be greener and expand their knowledge to other countries; however, I believe that if people are inspired to help in this problematic by their favorite people, they are going to do it and even they could inspired others to change their ways of living.

I'm saying all of this based on my experiences. For example, when I started to change some aspects in my lifestyle, like reducing the use of plastics and applying the 3 R's in different ways, I felt proud of myself, since I knew that the change I made was for having a better environment.

I believe that if we all take part in this topic, we will make the change faster, and all of us are going to receive benefits.

Last but not least, I would like to ask two questions; the first one is How could people inspire others if they aren't famous?, and What do you think is the starting key to take part in the contribution of more specific issues?

Thanks for listening to me and for being interested in this topic. Have a wonderful day.
