PGC Day 1 Greener

Photo:

Caption: Taking in the Hubbard Glacier views in Alaska, it is a great reminder of the beauty of our planet. However, while admiring the “river of ice” I noticed it was suffering from a lot of melting which was disheartening; It made me wonder if the next few generations would be able to enjoy the same view. I want to ensure that our planet remains the same if not better for succeeding generations and therefore I am very excited to be a part of the 2023 Project Green Challenge cohort to work towards a more sustainable future @turninggreenorg ! #projectgreenchallenge #PGC2023

Hubbard Glacier

turninggreenorg was invited to be a collaborator but hasn't accepted yet.
