

## Produce an informative and mobilizing call to action insisting that leaders enact policy to act on climate change.

## video script:

Have you ever thought about how incredibly unlikely our existence is?

The more we learn, the more questions arise. The conditions around us, from the nuclear force that holds atoms together to our planet's ozone and magnetic field, are examples of perfection.

What would happen if we were further away or closer to the sun? If there was no oxygen? Or what if the universal gravitation constant was different? Simple view, weaker gravity would make us jump higher. But would life exist? Would matter have joined together to form planets? What if the gravity was greater? The planets would have formed, but the stars would consume their fuel faster, preventing the development of life.

After knowing this, do you believe that life has so little value that it should be destroyed? It is something that took millions of years to form and is also beautiful.

Today, more than ever, we need courageous leaders. Not only in politics, but in the public sphere. Influential people, like you, who can change perceptions, inspire action, and lead by example.

This is our call to action, a call to everyone: leaders, celebrities, conscious citizens. Let us unite in this common cause. Let's change our narrative, redefine our priorities and defend the only home we have.

## Description

Today, we are inviting our community to take action and our leaders to lead the way towards a more sustainable future. In this challenge, we're not just raising awareness; we're creating a movement!

Join us as we inspire the community to rise up, take responsibility, and lead by example. Together, let's tackle environmental challenges head-on, promoting positive change in every action we take.

Are you ready to make a difference? Share your ideas, inspire others, and show that together, we are unstoppable! • \* #PGC2023 #LeadingTheChange #Sustainability #EnvironmentalAction

### Future! #ClimateActionNow I >

Dear leaders and representatives,

I hope this message finds you well. I am reaching out to you as a concerned citizen about the future of our planet and the generations to come. At a time when climate change has become an imminent threat to our world, it is imperative that we take significant and collaborative action to curb global warming.

Today, I invite you to join a global movement to address this crisis and make the world a more sustainable place for everyone. We are facing unprecedented challenges: rising temperatures, extreme weather events, and accelerated loss of biodiversity. These issues require bold solutions and immediate actions.

I challenge you to commit to working together to reduce our greenhouse gas emissions, promote renewable energy sources, and adopt sustainable practices in all areas of our lives. It is time to think beyond political borders and unite in a joint effort to preserve our planet for future generations.

Each of you has a crucial role to play in this mission. I encourage you to propose and support concrete measures to reduce carbon emissions, promote environmental conservation, and encourage education about climate change. Together, we can make a significant impact and lay the groundwork for a more sustainable and healthier future for all.

To unite and share our actions, I propose using the hashtag #ClimateActionNow on social media and in all our environmental-related initiatives. This hashtag will allow us to track our contributions and raise awareness about the importance of climate action.

I urge you to accept this challenge and commit to tangible actions to reduce global warming. Together, we can make a difference and build a more hopeful future for our planet and future generations.

Thank you for your attention, and I look forward to your support in this important cause.
