but strength and your commitment

Our demonstration is creativity To build a trash can with plastic bottles, you will need the following elements:

- Empty and clean plastic bottles
- Some glue or strong
- A large trash bag
- Optionally, a bracket or hook to hang the trash can

Here are the steps to follow:

1. Choose a sufficient number of plastic bottles to create the desired size of the trash can. You can use bottles of the same size or different sizes for a more original look.
2. Remove labels, caps and lids from bottles.
3. Using a knife or scissors, trim away the bottom of each bottle to create an opening wide enough to dispose of the waste. Make sure to smooth out the edges to avoid cuts.
4. Stack the bottles one by one, securing them together using glue or strong tape. Make sure to align them correctly.
5. Once the bottles are securely attached, you can choose to attach them to a wall mount or hook using heavy duty tape or zip ties.
6. Insert a large trash bag inside the bottles to

recycling project that costs nothing but strength and your commitment

Our demonstration is creativity To build a trash can with plastic bottles, you will need the following elements:

- Some glue or strong**
- A large trash bag**
- Optionally, a bracket or hook to hang the trash can Here are the steps to follow:**

1. Choose a sufficient number of plastic bottles to create the desired size of the trash can. You can use bottles of the same size or different sizes for a more original look.

2. Remove labels, caps and lids from bottles.

3. Using a knife or scissors, trim away the bottom of each bottle to create an opening wide enough to dispose of the waste. Make sure to smooth out the edges to avoid cuts.

4. Stack the bottles one by one, securing them together using glue or strong tape. Make sure to align them correctly.

5. Once the bottles are securely attached, you can choose to attach them to a wall mount or hook using heavy duty tape or zip ties.

6. Insert a large trash bag inside the bottles to collect and contain the waste. And there you have it, you now have your trash can made from plastic bottles!

Remember to empty the trash bag regularly and replace it to keep your trash can clean and functional.
