## ✓ DAILY TASK

**Question 01:** Now it's time for you to create your own art piece out of found "trash." Think creatively!

Write a short reflection explaining your thought process.

### Answer:

While cleaning my room I have found a lot to trash .Such As glass bottle , cup noodles empty cup, Plastic solar. As the pgs2023 challenge its time to transform this trash into a peach of art.

### Art Piece Idea: "Botanical Symphony."

#### My Thought or Idea:

"Botanical Symphony" is a creative exploration that combines the beauty of nature and the house hole recycling wastes with the charm of crafted art. The primary focus is on upcycling empty bottles, cups etc. Into unique plant containers, adorned with little craft touches.

#### Materials:

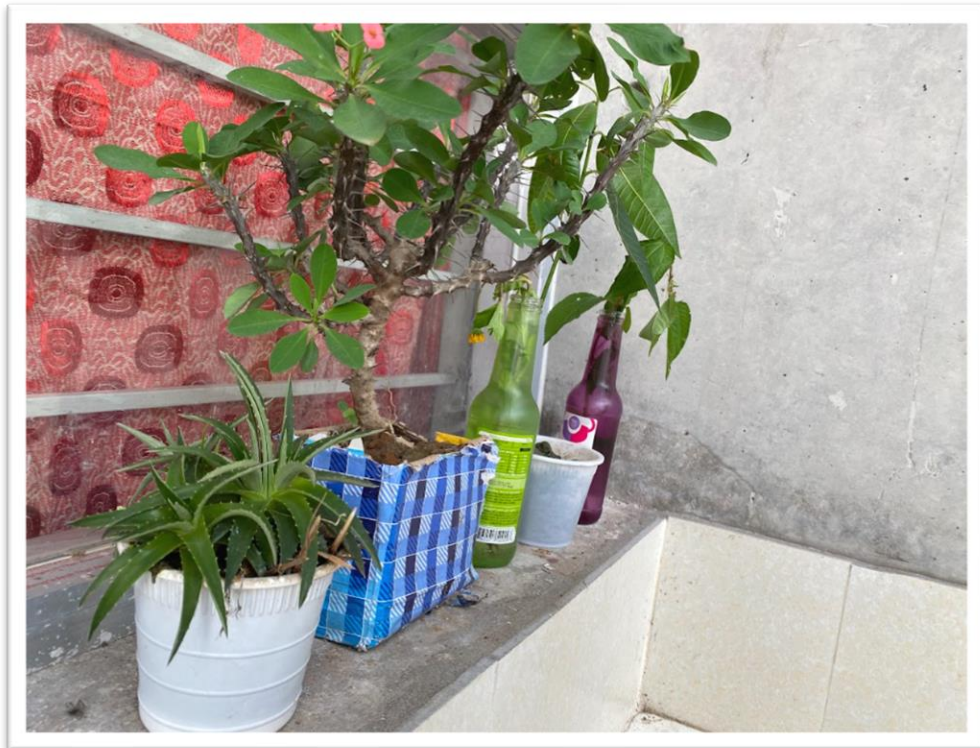

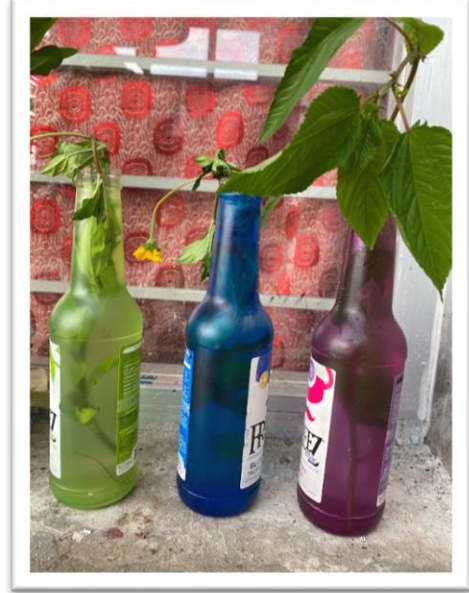

- ✓ Plastic cup
- ✓ Glass bottle
- ✓ Paper trash
- ✓ Plants
- ✓ Coloring elements

#### Process:

- + **Bottle Transformation:** Clean and prepare the bottles for their new role as plant containers. Consider using both plastic and glass bottles for variety!
- + **Crafting Touches:** Get creative with decorating the bottles. Use vibrant paints, markers, or decoupage techniques to add unique designs.
- + **Planting Process:** Put water in the bottles and plant there some local plants which can survive in water. For this they don't require daily watering.
- + **Box plant/Cup:** Take some boxes and create shape like square then give soil and plant trees.
- + **Arrangement and Display:** Put this plant where you like most it could be in the side of window or table.

## Results

### **My Short Reflection and thought process:**

The idea of the Botanical symphony is really very interesting and enjoy also saving money for room decoration. Painting and decorating these pots felt like putting a piece of myself into each one. crafting a scheme of colors. The touch color and texture that transforms plain cups into uniquely beautiful pots.

Planting bottles with green partners felt like bringing new friends into my space, making for a little garden of joy. The act of giving life to the characters I played myself brought a different sense of accomplishment. These are not just plants; They live art and breathe stories of change and care.

By organizing around my room, I created a closet—a symphonic botanical study if you will. It’s not just aesthetics; It’s a testament to the beauty that can come from everyday objects when we incorporate creativity and nature. This project isn’t just sculpting; it’s about weaving a story of renewal, where the abandoned is appreciated and the ordinary is transformed into the extraordinary. This very enjoyable my room looks more beautiful than other I really enjoyed by doing this.
