School: Staten Island Technical High School

For today's challenge, I created a fish using a plastic bottle. This project was both very fun and simple I began by cutting off one end of the plastic bottle and filling it with a collection of cut-up newspaper scraps that would otherwise have been discarded. Creating the graphics was also a lot of fun, as it was fascinating to observe my fish blending in with the other art fishes. This challenge gave me a fresh perspective on the possibilities of recycling materials that are right next to us!

PLASTIC BOTTLE FISH
