My Mom's Review of My DIY Dry Shampoo

At first, she was skeptical. But after demonstrating and having her try the dry shampoo for herself, she responded, "Wow it works great!"

My mom was not only surprised at its functionality but also how simple it is to make dry shampoo at home—only 3 ingredients! Compared to the store bought dry shampoos that utilize and smell like chemicals, this one has a barely noticeable smell despite the cocoa powder being there.

Although my mom has always been somewhat aware of what's in her hygiene/cosmetic products and has always tried to choose the healthiest option, she is definitely motivated by my DIY to be even more conscious in picking her products and to dig deeper into the actual ingredients in the bottles, not just the ones that are written.
