Oceans

Save the mangroves

“If there are no mangroves, then the sea will have no meaning.
It’s like a tree with no roots, for the mangroves are the roots of the sea!”

— Mad-Ha Ranwasii

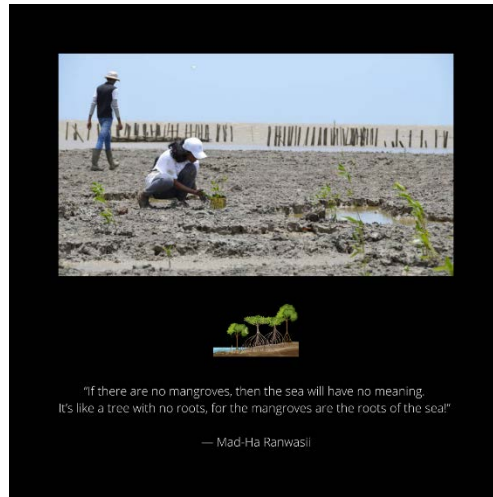

Threats

In Suriname

1. Infrastructure expansion
2. Overfishing
3. Inappropriate construction of dikes
4. Sand and oil mining
5. Conversion
6. Coastal erosion
7. Hydrological disturbances

"If there are no mangroves, then the sea will have no meaning. It's like a tree with no roots, for the mangroves are the roots of the sea!"

Let's Join

Plant and Protect Our Mangrove

Mangrove protection safeguards the various functions that these ecosystems play and therefore the communities that use them of them. The management of the coast with all its water resources, forests, vegetation and animal species must be done in an integral way in order to guarantee.
