letter regarding gly

Wanica, 15 October 2023

To: The Minister of Education in Suriname

About: Schools Green Grounds Certification

Dear Minister,

My name is B.Pinas, and I am a student at the Anton de Kom Universiteit van Suriname, studying Law.

Our campus grounds are very important to our health, and so is the ground of every educational institution under your supervision, from Kindergarten to our only University.

We can't protect ourselves in every way, and we can't wait for a new Law to be made when our health is in direct danger...like when **Glyphosate** is being used to "clean" grounds of buildings where we get educated in.

Luckily, our constitution settles that Ministers can and even must make rules regarding and within their authorization to protect all who are active within. This is why I turn to you to help all educational institutions from Kindergarten to our only University to not only be **free from Glyphosate** but also get Green Grounds Certified. Not only would you make sure that one of the first rights of a living human, even of children and the youth in this case, will be protected but you will also set the bar high and even create a positive legacy, empower and influence others by doing so.

Be the Minister who cared enough to get it done; invite students of different faculties of our University to volunteer and help get this done; collaborate with your fellow Ministers, organizations and companies; interest donors to fund healthy alternatives for glyphosate and work together with your staff and our DNA to educate the people via a social media campaign. You can learn more about how we can get this done to have healthier, safer and greener educational institutions all over Suriname here: <https://www.rewildyourcampus.org/green-grounds-certification>

Looking forward to receive a positive response from you, I wish you and yours a good day further.

Sincerely,

Brigitte Pinas.
