

GLYPHOSATE

A THREAT TO HUMAN HEALTH AND BIODIVERSITY

Glyphosate, a widely used herbicide, poses a grave danger to both our well-being and the delicate ecosystems we rely on. It's time to shed light on its devastating effects and take action for a glyphosate-free world!

🌍💪 Join the Movement for a Glyphosate-Free World! 💪🌍

🚫 Discover the Alarming Impact: Explore our eye-opening poster to uncover the hidden dangers of glyphosate on human health and biodiversity. Learn about its detrimental effects on our bodies and the fragile ecosystems that sustain life.

❤️ Devastating Effects on Our Bodies: Glyphosate has been linked to various health issues, including cancer, reproductive disorders, and disruption of the endocrine system. Let's protect ourselves and future generations by raising awareness.

❤️ Fragile Ecosystems at Risk: Glyphosate not only harms human health but also wreaks havoc on biodiversity. It destroys vital habitats, threatens pollinators like bees, and disrupts the delicate balance of our ecosystems. We must act now to preserve our planet's rich diversity.

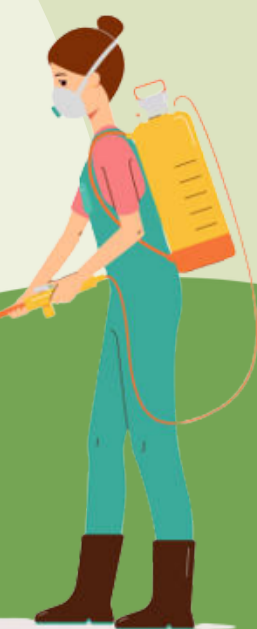

🌍💪 Take a Stand for Our Well-being and the Future of Our Planet! 💪🌍

✅ Spread Awareness: Share this poster with friends, family, and communities to educate them about the dangers of glyphosate. Together, we can build a strong network of informed individuals.

✅ Advocate for Change: Support organizations working towards banning glyphosate and promoting sustainable alternatives. Contact your local representatives, sign petitions, and raise your voice for a glyphosate-free world.

✅ Embrace Sustainable Practices: Choose organic products, support regenerative agriculture, and promote natural alternatives to glyphosate. Small changes in our daily lives can make a significant impact on our health and the environment.

Let's protect our health and safeguard the future of our planet. Together, we can create a world free from the hidden dangers of glyphosate!

copy of my letter

Hi Mrs.Arabi

My name is Aftab Hekmat shoar and I am a student here at Sedighe kobras school . Our beautiful campus grounds are an integral part of why I love this school so much, and the landscape is such a large part of our identity as a school. That is why I would love to see our campus become Green Grounds Certified. This certification goes beyond just how our campus appears, and delves into how we are taking care of the very ground our campus sits on. With an emphasis on improving soil health and climate resilience, reducing water needs and increasing carbon sequestration, becoming Green Grounds Certified will help our campus get recognition for not only how beautiful it is, but how wonderfully it is managed.

Re:wild Your Campus's Green Grounds Certification is establishing a new standard of land care that prioritizes human and environmental health. Through the elimination of synthetic pesticides and implementation of organic practices we will be reducing the threats posed by synthetic inputs (many of which are carcinogenic, harmful to wildlife and waterways), and improving our campus ecosystems. This is a really exciting way to improve campus sustainability efforts and make our campus more attractive to potential students and donors. You can learn more about how we can make our campus healthier, safer, and greener here: <https://www.rewildyourcampus.org/green-grounds-certification>

Sincerely,
Aftab Hekmat Shoar
