Institution: Jahangirnagar University

Project Khale Hobe is a teamwork city-cleaning initiative by awesome collaborative magic of all. It was aimed and visioned by an activist, cartoonist, actor, and leader, **Morshed Mishu**, who saw the potential for change. He rallied young minds, city dwellers, and stakeholders, and together to achieved the impossible.

They cleaned the
entire Khal in
Mohammadpur and
saved a local
waterbody

In just two days,
they cleaned up
an entire culvert
and painted the
once-dingy
bridges above it.

It was seemed to be an impossible task but with the help of locals, and Dhaka North City Corporation they managed to complete the task.

Collaborative efforts by all is mainly crucial to implement such initiatives. They wished to clean the whole Dhaka and want to be an exception for the future
