# Dear Mr. Lafazan,

We are writing to you as a group of environmentally conscious youths that wish to bring about change in our community. Our name is Pathto2030 because our main goal is to advocate for meeting the climate standards agreed to be met by 2030. We are committed to advocating for our beliefs, and so we are writing this email today with concerns regarding Long Island's water quality. As you know, Long Island is full of picturesque beaches, parks, and harbors. However, the quality of the water flowing through the pipes into every home is less than ideal.

Recent reports and studies have highlighted a significant decline in water quality across several key areas, indicating the presence of pollutants, contaminants, and other harmful substances. This decline poses a severe threat to the local ecosystem, including marine life and the overall health of our residents. It is imperative that immediate and effective measures be taken to address this critical issue.

Our community is in need of a comprehensive plan that includes monitoring systems, strict regulatory measures, and strategic initiatives aimed at preserving and restoring the water quality in Long Island.

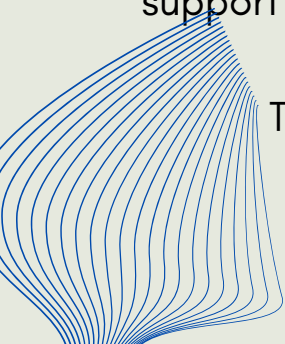

Without decisive action, the consequences for our environment and public health could be irreversible. We urge you, as one of our elected politicians, to take a leadership role in advocating for the protection and restoration of our water quality. It is crucial that we work together to ensure that Long Island's water resources are safeguarded for the present and future generations.

We can involve the community's support in these endeavors by hosting water workshops and information sessions. We could also go as far as to have volunteers conduct projects at local schools in order to spread awareness of the issue.

We kindly request that you consider this matter with the utmost urgency and bring it to the forefront of your legislative agenda. We look forward to your prompt action and continued support in resolving this pressing concern.

Thank you for your attention,  
Team Pathto2030

pathto2030

pathto2030 Here's our pressing letter to NY politician @joshlafazan in order to advocate for changes in water policy. These issues are very real within our community, and we felt that it was necessary to highlight the issue of water, since it is a basic human right.
