

Project Green Challenge

Day 24
“ Food Waste ”
Greenest Challenge

NO FAKE

BEAUTY

Here's the truth:

Fruits and vegetables are examined before they reach supermarket shelves. If their size or shape doesn't meet a certain standard, it's thrown out.

Produce is being thrown out by the ton because of how it looks!

**CUT FOOD
WASTE
TO CUT
EMISSIONS**

17%

Around 17% food grown
is wasted in households
!!

**691-783
MILLIONS**

This many people faced
hunger in 2022 !!

**When food waste rots, it creates methane.
That's even more potent than carbon dioxide.**

**DON'T
WASTE
FOOD**

COMPOST

Here's how

In your school canteen left over which can't be eaten by you then it can be eaten by your plants definitely.

There are multiple guides available to learn how to compost.

In school canteen lot's of food is wasted which can be freezed appropriately.

Throwing out food is not only a waste of produce and your money. It's actually harmful to the environment. That's because when food breaks down, it creates methane gas.

Do what you can to reduce food waste.

**IF YOU HAVE MORE OF
IT, YOU CAN GIVE SOME
OF IT !!**

FOOD FOR THOUGHT:

In some schools there is food which good in condition but no one to eat it. Hence you can become incharge of your school canteen and donate that to other schools, or any organisation near by you.

FIGHT FOOD WASTE

**IT'S A RESOURCE
MILLIONS GO WITHOUT.**

FOOD FOR THOUGHT:

In some countries, approximately half of all the food produced goes to waste. There is enough food produced to feed everyone in the world but because of our irresponsibility people go to bed with empty stomach !!!

It's more than a shame to waste food.

These were some of the issues we encountered in our school canteen. And other places.

We humbly request you to search for @silky_woven on Instagram because we can't attach the link here due to size of the PDF.
