este plan contempla la vinculación de tres componentes principales ...

This plan contemplates the linking of three main components.

This plan contemplates the linking of three main components.

ELECTRICIDAD, GAS Y LITO

en cumplimiento de los compromisos internacionales en materia ambiental.

In compliance with international commitments on environmental matters.

la explotación de este mineral se dará a través de alianzas estratégicas con distintos países asegurando la transferencia tecnológica para México manufactura con la construcción de un corredor de tecnología se impulsará la fabricación de microprocesadores y baterías para promover la transición energética de la industria Automotriz hacia la electromovilidad

ensuring technological transfer for Mexico manufacturing with the construction of a technology corridor the manufacturing of microprocessors and batteries will be promoted to promote the energy transition of the Automotive industry towards electromobility

## **DESCRIPTION:**

This Mexico-USA collaboration. The US is a significant step towards a sustainable future. But it is not enough to celebrate: we must carefully monitor it. It is vital to analyze the long-term viability of these climate actions. Only in this way can we guarantee a lasting and positive impact on our environment and on our lives.
