

SUSTAINABLE ENERGY

ROMINA CAONTRERAS,
HUIXQUILUCAN

A REPORT BY THE HUIXQUILICAN
GOVERNMENT STATES THAT

85% of Mexican land is
optimum for solar
projects, which would make Mexico
the **7th largest**
power in said energy
sector

AND YET, SOLAR AND WIND ENERGY CONTRIBUTE TO
ONLY 16.92% OF MEXICO'S TOTAL ELECTRICITY
GENERATION

**“Huixquilucan municipality
focuses on implementing
international and local energy
efficiency standards to reduce
emissions and combat global
warming”**

TRANSLATED FROM THE SAME REPORT

Municipal policies based on the SDGs 7, 9, 11:

**impulse efficient energy use through the
modernization of lighting systems**

**manage projects to promote the use of
technologies that improve the quality of
electrification services and further reduce
energy consumption**

**promote the use of
sustainable energies in compliance with the
NOM**

Mexico's reliance on dirty energy is a big issue; our current president shows no sign of moving away from fossil fuels and actively promotes them! Our diverse country shows major potential for many renewable energy sources, such as solar panels or geothermal energy. That is why we need more leaders like Romina Contreras who will enact the changes required in order to mitigate the harmful effects of climate change!

SUSTAINABLE ENERGY

ROMINA CAONTRERAS,
HUIXQUILUCAN
