## GREENER - 40 POINTS

- Consider 4 to 5 topics you are passionate about and create your own political platform. These issues can range anywhere from environmental justice to water rights, or sustainable farming to plastics. Feel free to be creative with your presentation; an essay, video, podcast, infographic or medium of your choice.

### **1. Universal access to quality education, from pre-K through college**

Everyone deserves to have access to quality education, regardless of their origin or socio-economic status, as it is the right of every human being and the key to bettering oneself in society. This should be an equal opportunity in all senses, with the quality that everyone deserves and the support that is due to obtain academic tools that respond in the working life and development of society.

### **2. Support sustainable agriculture**

Conventional agriculture practices can have a significant negative impact on the environment, including polluting our waterways, contributing to climate change, and reducing biodiversity. Sustainable agriculture practices, on the other hand, are designed to minimize these negative impacts and protect our natural resources.

### **3. Expanded access to mental health services**

Mental health conditions can have a devastating impact on people's lives. They can lead to problems at work, school, and in relationships. They can also increase the risk of suicide. The sooner someone receives treatment, the better their prognosis. However, many people have to wait months or even years to get an appointment with a mental health professional.

### **4. Invest in renewable energy**

---

Climate change is the greatest threat facing our planet today, and renewable energy is the key to solving it. Renewable energy sources, such as solar and wind power, do not produce greenhouse gases, which are the main cause of climate change.

The renewable energy industry is one of the fastest-growing sectors in the economy. Investing in renewable energy will create jobs in manufacturing, construction, and installation.

- Once you've finished, go on a digital search for the person that represents your beliefs. This can be an individual from any government around the world. Write another 3-4 sentences on how you agree with their views and want to show them support.

**Alexandria Ocasio-Cortez** (United States): She is a Representative from New York who is known for her progressive views on education and renewable energy. She has supported policies such as making college tuition-free, expanding access to early childhood education, and investing in a Green New Deal.
