

earthilycassandra

earthilycassandra Welcome to Day 1 of Project Green 2025! ❤️

Project Green is a 30-Day sustainability challenge, calling for young voices to action against climate change. I am participating in Project Green because I love the earth, and strongly believe we should do anything to protect it. In our modern world, everything that makes our lives more convenient - including our food, home energy, and transportation has a negative impact on the climate. We must come up with green solutions for the world to live comfortably before it's too late.

Project Green makes climate action both fun and easy, with exciting challenges and daily prizes! Join today at projectgreenchallenge.com! 🌍
