BECKY LIU ANNI CHEN PETER ZHAO JASON XIE

Our team wants to participate the project green challenge because we believe every informed citizen is responsible for forestalling climate crisis. We want to spread awareness of how climate change might influence the living organisms on the world and how should we use our privileges to protect the vulnerable groups. We want you to be aware of how precious the natural resources are on the earth, and challenge you to live with our planet in harmony.
