GREENEST #PGC2025 DAY 2

Climate change is more than an environmental crisis it is a justice crisis. While wealthier populations drive the majority of global emissions, it is the vulnerable-low-income communities, informal workers, smallholder farmers, women, children, and the elderly who suffer the harshest consequences. In regions like Ghana, rising temperatures, erratic rainfall, and resource scarcity threaten food security, health, and livelihoods. These groups often lack the infrastructure, financial resilience, and political voice to adapt or recover.

RESPONSES ON THE EFFECT OF CLIMATE CHANGE

LILIAN a high school student of ST. LOUIS SCHOOL.

**People's Responses to
Climate Change**

**Many individuals are sharing their
personal experiences on how
climate change has dramatically
impacted their lives and
communities.**

Individual Stories Matter

**Lilian, a student from the St.Louis
Senior High School, Ghana voiced
out that
"The climate Change has impacted
my life negatively, it has led to high
cost of living since my parents had
to purchase mechanical fans due to
the harsh weather these days, it
has also led to food scarcity due to
inadequate rainfall and scarcity of
fishes in the sea and other water
bodies since the waters are almost
drying up."**

People's Responses to Climate Change

Many individuals are sharing their personal experiences on how climate change has dramatically impacted their lives and communities.

Individual Stories Matter

**This is a teacher's responds
Due to the climate change students usually report to school very late and feel tired even before clases start.
This is due to the fact that they are unable to get good night sleep due to the hot season and the harsh weather these days.**

**"I think farmers and fisherfolks suffer the most due to the fact that their livelihood depends on the weather.
"Planting more trees in the various communities would go a long way to help by providing shades, reducing carbon content and in the long run restoring rain fall pattern "**

A local activist in the Amnesty International, Ghana

THE PEOPLE'S VOICE ON CLIMATE CHANGE

A local activist in the Amnesty International, Ghana said , "a change in climate affects the livelihoods of these people. The change in climate disrupts their livelihood,creation opportunities, leaving these people in poverty, especially when the change in climate is not favourable.

In my area, I believe in the simple actions of greening the environment with natural plants to help combat climate change.

Also, old gadgets and vehicles, which are unworthy of use, especially transport vehicles that give out fumes, should be regulated as they have negative impacts on the environment."

People's Responses to Climate Change

Many individuals are sharing their personal experiences on how climate change has dramatically impacted their lives and communities.

Individual Stories Matter

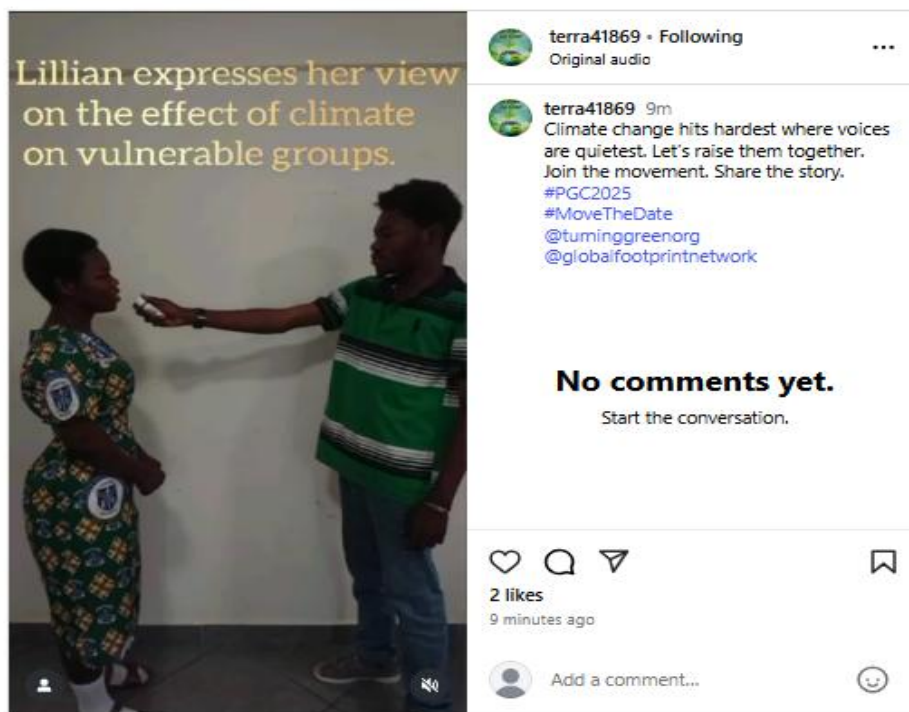

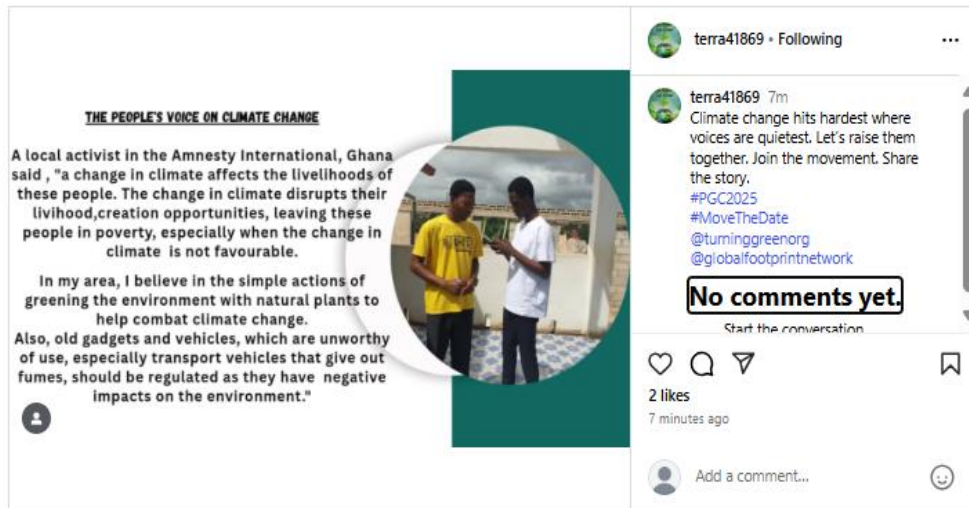

A food vendor in the school said Prices of food stuffs has gone up due to the fact that farmers are producing less due to the climate change and reduction in rainfall. Selling food at higher prices to the students are sometimes awkward to me because I am also a mother."

"I think the poor in the community suffer the most due to the high cost of living these days, prices of food stuffs, and even clean water has gone up."

"I think the government can support farmers by providing irrigation systems that will help all of us"
