Amoani-Antwi Charles

Bekoe Papa Offei Obuobisah

Ewurama Nhyira Acquaaah

**Username: caamoani**

**Schools:** Kwame Nkrumah University of Science and Technology & University of Mines and Technology.

### **Brief Information About Leaders:**

#### **1. Nana Owusu Anokye II**

Nana Owusu Anokye II is the chief and head of the traditional council of Modaso, my hometown. He also has affiliations to the KNUST school board and I believe he will be of tremendous help and support to my suggestions of making our community a better place for future generations.

## **2. Hon. Stephen Fordjour**

Hon. Stephen Fordjour is the elected Assemblyman of Modaso. He has organized several clean up activities and public education sessions in our community, demonstrating that he is very keen on the betterment of our community. Last year I got the opportunity to communicate with him during the 2024 PGC and I am hopeful he will be of help this year too.

### **3. Mr. Emmanuel Kwaku Danso Abeam**

Mr. Emmanuel Kwaku Danso Abeam is the Chairperson of the Community Unit Committee in Modaso. Last year, he also played a key contribution to my climate discussions with community leaders. He even suggested my suggestions regarding the Agbogbloshie waste management to the Assembly member of that town. I look forward to working with him this year too.

## **Letter to leaders:**

Good day sir,

I am writing as a concerned member of our community and as an active participant in the 2025 Project Green Challenge to share my insights on some of the climate related challenges around us. A key issue I have noticed is the not so good quality of drainage and waste management. Whenever it rains, the roads become extremely muddy, making it difficult for students to get to school and stressful for workers trying to reach their jobs. Combined with other issues, these conditions in our community considerably slow down daily life and affect the well-being of residents.

I believe local climate action matters because it directly shapes how resilient and livable our community is. By improving the drainage and waste management conditions, we would be making mobility easier and essentially making the living conditions of residents much better as it would lead to reduced health risks.

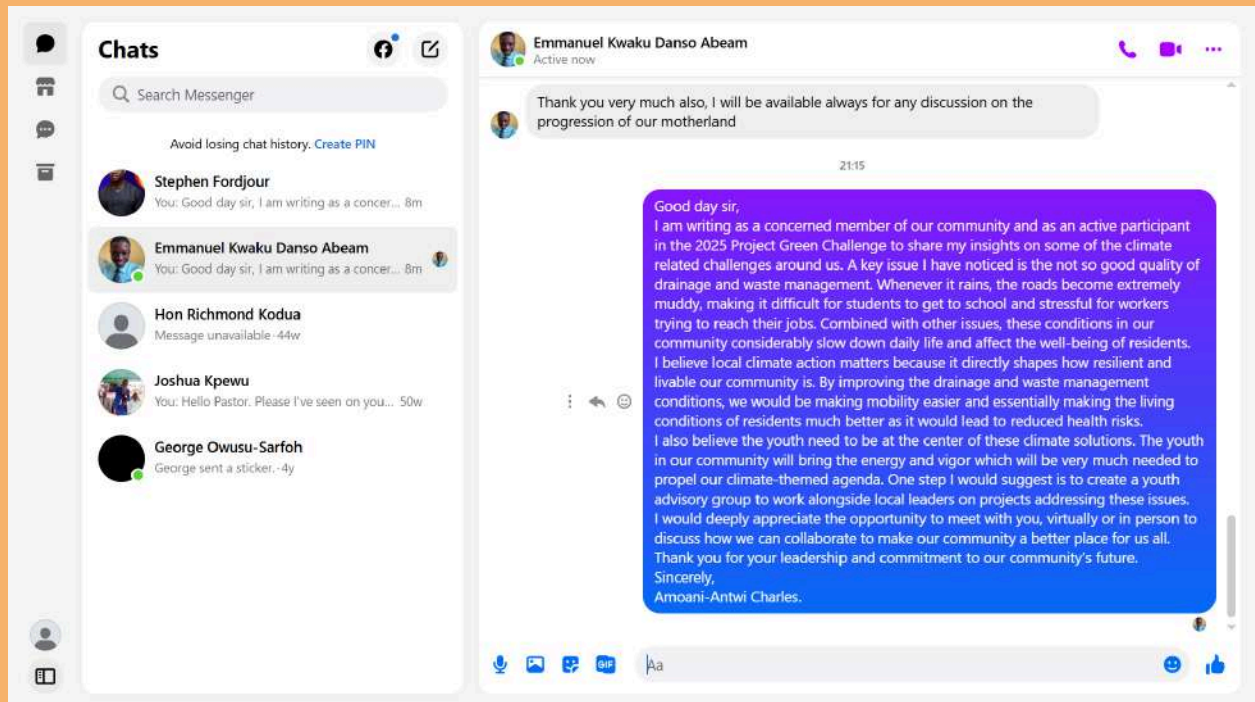

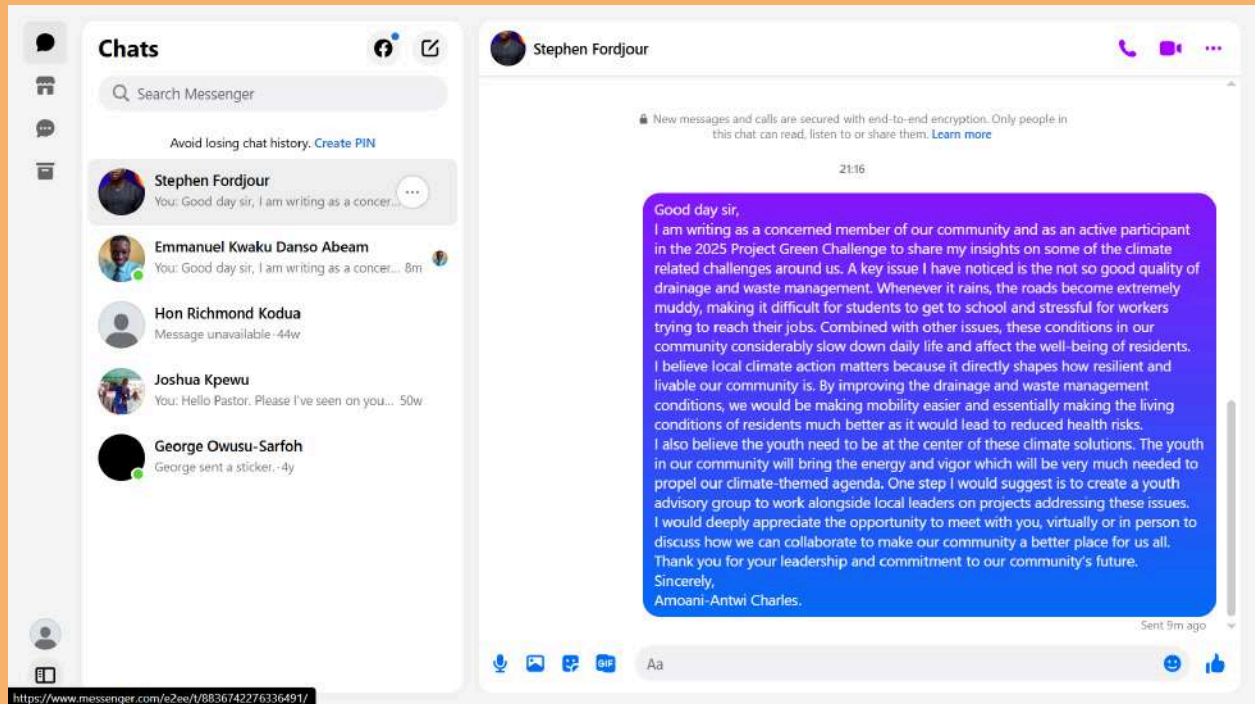

I also believe the youth need to be at the center of these climate solutions. The youth in our community will bring the energy and vigor which will be very much needed to propel our climate-themed agenda. One step I would suggest is to create a youth advisory group to work alongside local leaders on projects addressing these issues.

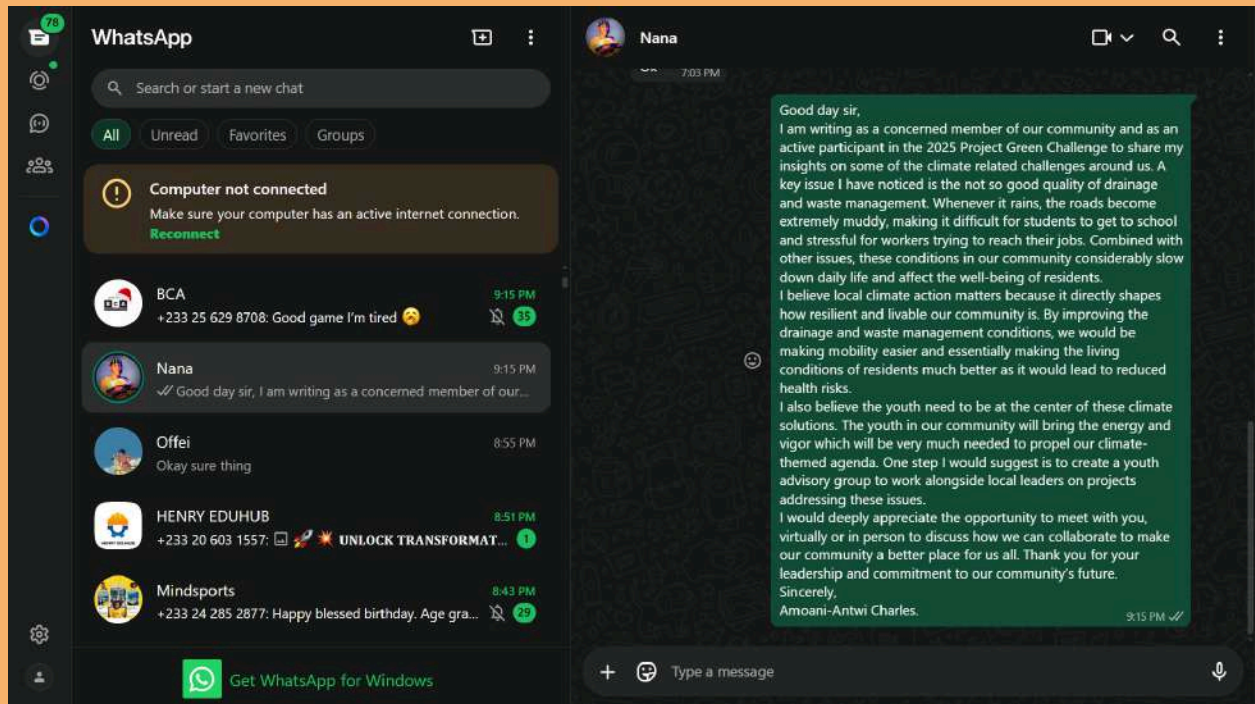

I would deeply appreciate the opportunity to meet with you, virtually or in person to discuss how we can collaborate to make our community a better place for us all. Thank you for your leadership and commitment to our community's future.

Sincerely,

Amoani-Antwi Charles.

**PS:**

I got a reply from Nana Owusu Anokye II and he has assured me that he would be available for a virtual meeting some time next week.
