**Subject:** Climate Action Initiative for Local School  
Dear Mr Donyaei  
I hope this email finds you well.**I'm observing in my community:**Lately, I've noticed several environmental challenges in our community, such as increased litter in public spaces, reduced green areas, pollution . These issues are affecting both our environment and our daily lives.**Why local climate action matters** to me,Taking climate action at the local level is essential because real change starts close to home. Schools play a key role in inspiring students and families to adopt sustainable habits, making a lasting impact on the community.  
**I emailed you because:**I'm reaching out because I believe your school can be a leader in promoting environmental responsibility. Your support could help us start meaningful initiatives that involve students, teachers, and parents.  
**One step I hope** you take it in action  
One simple step we can take is to launch a **"Green School Campaign"**, where we organize regular clean-up days, plant more trees on school grounds, and encourage everyone to reduce waste. This would raise awareness and create visible, positive change. Thank you for considering this idea. I would love to see your students in nature . I hope my words were impactful.  
Best Wishes  
Zahra.Miri Dizaj
