

PGC Day 3, Greenest Edition

For this I want to write to the Upazilla Union Parishad about the issue.

Name: Awal Hossain.

Sub: Urgent Need for Climate-Resilient Infrastructure and Youth Involvement in Flood Management

Dear Union Chairman,

On behalf of the people of the Bangshal Union, I am writing to express my deep concern about the increasing flooding and infrastructure damage in our area, particularly around the old pond near my home. On October 1st, heavy rainfall caused the pond's decades-old side wall to collapse, flooding nearby roads with waist-deep water. Tragically, a middle-aged man lost his life after falling into the pond during the storm, and just two weeks earlier, a young boy was electrocuted when a live wire fell into the floodwater. These heartbreaking incidents highlight how vulnerable our community has become to the growing impacts of climate change and inadequate maintenance. There are some photos attached for you to see the overall situation.

Local climate action is no longer optional—it is a necessity for saving lives and protecting our environment. I urge the Union Parishad to take immediate steps to rebuild and reinforce the pond wall using sustainable design, improve drainage systems, and implement regular maintenance programs.

I also request that youth from our community be included in future planning and awareness initiatives. Young people are eager to contribute innovative ideas for climate resilience, early warning systems, and safe infrastructure.

I would be grateful for an opportunity to discuss these concerns and potential youth-led solutions with you, either in person or virtually at your convenience.

Sincerely,

Sadia Khatun,

Bangshal Thana Area, Dhaka, Bangladesh.

NB for the reader: This challenge was really challenging for me. For me who is just a girl never thought that I will write directly to the chairman. Woman are not that empowered in my country. But this challenge pushed me. Finally, thanks to whoever thought off this challenge.
