# RESTORATION OF TIDAL WETLANDS!

ENVIROENTHUSIASTS 2025

jhsenviroenthusiasts Day 3: Greener 🍀

In our local community, the Town of Oyster Bay has put in several projects to restore the tidal wetlands near us. 🌊  
🌿 These ecosystems are crucial, serving as natural flood control and filtration, and serving as a habitat for 2 federally endangered bird species 🦉 along with other marine animals. Students can get involved by participating in community clean-ups and planting events.

This is just one example of one of the many environmental protocols in our area. We hope you were able to learn a little about this one from this post!
