big.green.beans By listening to the podcast, I was very shocked how Nemo's couldn't find their homes (coral reefs) because of the climate crisis. I was also shocked by the serious problem of overfishing. The ocean should be recognized not only as a part of our nature in the earth, but a true home to many vital marine species. My response of the collage answers the question "what would it look like if we really lived as if we loved the future and all the possibilities it holds?" by showing the possibilities of making the ocean a true home to the marine species and protecting it. The binoculars symbolize the vision and the possibility of the future.
