

#Day23 Purpose

Task Greenest

➤ Team name: Grenera

➤ User name: @sanjida_

➤ School: Jahangirnagar University

1. My Climate-Positive Action: Presenting on Global Warming at My University

To bring my purpose to life, I chose to **organize and present a session about global warming** for students at my university. My goal is to help others understand how climate change affects our planet, our country, and our daily lives and to inspire small actions that make a difference.

Figure 1 Presenting Global Warming Impact on my University

During the presentation, I will:

- Share simple visuals explaining the causes and impacts of global warming.
- Highlight local effects in Bangladesh, such as rising temperatures, flooding, and sea-level rise.
- Discuss practical solutions like reducing waste, conserving energy, and supporting green initiatives on campus.

By educating and engaging my peers, I hope to create a ripple effect of awareness and responsibility. Even a single talk can spark new ideas, motivate eco-friendly habits, and build a stronger climate-conscious community.

2. My Team Collaboration: NCI(Nature Conservation & Initiatives) Club

To strengthen my climate-positive action, I teamed up with our university's environmental club, **NCI (Nature Conservation & Initiatives)**. NCI is a student-led organization that works to protect nature and promote sustainability through awareness campaigns, clean-up drives, tree planting, and educational programs.

Figure 2 Collaborating with NCI team

Together with NCI members, I planned a **presentation on global warming** to engage students and encourage environmental responsibility on campus. The club supported me with resources, event promotion, and ideas to make the session interactive — such as using visuals, short videos, and discussions about local climate impacts in Bangladesh.

Collaborating with NCI not only made the event more impactful but also reminded me that **real change happens through teamwork**. By sharing a common goal of protecting our planet, we are helping to build a more aware and active university community.

3. One-Page Climate Action Plan

Action and Why It Matters

I will organize and present a session on **Global Warming** at my university, in collaboration with the **NCI (Nature Conservation & Initiatives)** club.

This presentation aims to raise awareness among students about the causes, effects, and local impacts of climate change, especially in Bangladesh.

By educating others, I hope to inspire small, daily actions like reducing plastic use, saving energy, and supporting eco-friendly habits that collectively make a big difference for our planet. Raising awareness is the first step toward creating a more climate-conscious campus community.

Who's Involved and Timeline

- **Team:** Sazeda Sultana Sandhi (project lead) and members of **NCI Club**, with guidance from a faculty advisor Mst Beauty Akter.
- **Timeline:**
 - **Week 1:** Meet with NCI and finalize the presentation plan.
 - **Week 2:** Prepare slides, visuals, and materials.
 - **Week 3:** Host the presentation and share resources with attendees.
 - **Week 4:** Collect feedback and encourage participants to join future NCI activities.

Success Checks (How I'll Measure Impact)

1. **Participation Count:** Number of students attending the presentation (goal: at least 30 participants).
2. **Post-Event Engagement:** Number of students who pledge or sign up for follow-up climate actions or NCI activities (goal: at least 10 new commitments).

ONE-PAGE CLIMATE ACTION PLAN

ACTION AND WHY IT MATTERS

ORGANIZE & PRESENT:
GLOBAL WARMING SESSION
SESSION @ UNIVERSITY
(with NCI CLUB).

TOPICS: Causes,
Causes, Effecal Impacts
Inspire daily actions
(reduce plastic, save energy,
eco-habits)

FIRST STEP: Climate-concious
concious campus

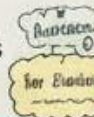

WHO'S INVOLVED AND TIMELINE

TEAM: Sazeda Sullana Sandhi
Sandhi (Lead),
NCI Club Members,
Mst Beauty Akter
(Faculty Advisor)

TIMELINE:

Wk 1: Plan
Wk 2: Prepare Slides,
Wk 2: Host Session
R/et Seack
Feedback & NCI Sign-ups

SUCCESS CHECKS (IMPACT MEASURMENT)

- **PARTICIPATION COUNT:**
- **POST-EVENT ENGAGEMENT:**
- Paest 10 new comtiments/NCI sign-ups

Figure 3 My one page Climate Action plan

3. My progress by including one image that captures my action taking shape

Figure 4 Manage our lecturer for my program execution

To ensure my climate action program runs successfully, I reached out to my faculty advisor, **Mst. Beauty Akter**, to seek her guidance and approval. She appreciated the idea of organizing a presentation on **global warming** and recognized its importance for raising environmental awareness among students.

With her support, I'll be able to **coordinate logistics more smoothly** such as reserving a classroom or seminar hall, inviting participants, and promoting the event through university channels. Her encouragement also motivates me to make the presentation more educational and impactful.

By working under the guidance of **Mst. Beauty Akter**, I'm combining academic mentorship with student-led climate action a collaboration that strengthens the program's purpose and ensures lasting impact within our university community.

3. My progress Image:

Figure 5: Some of my progress photos

some observations and feedback about my progress images:

- **Creative Layout:** The 3D and foldable paper elements (like the flaps, doors, and wheels) make the poster interactive and engaging. It encourages viewers to explore each section rather than just read passively.
- **Organized Sections:** I've included key aspects of global warming causes, effects, consequences, and solutions in a structured way. That shows solid understanding and planning.
- **Use of Color:** The use of bright colors (blue, red, yellow, purple) effectively highlights different themes and makes the content visually appealing.
- **Informative Details:** Including diagrams like the greenhouse effect and temperature rise helps visualize the science behind global warming.
- **Awareness Message:** The "Save your 20%" and "Why care about climate change?" parts show a call to action, linking learning to responsibility, a great educational approach.
- **Overall Presentation:** The poster looks well-balanced and neatly done, showing effort and creativity. It's perfect for classroom display, awareness campaigns, or environmental exhibitions.

Just wrapped up presenting my poster on Global Warming! 🌍 It was a great experience to share insights and discuss actionable solutions for our planet. Every small step counts, and I'm inspired to keep advocating for a sustainable future. Let's all do our part! 💚
